ABOUT ME

Futuristic and forward-thinking UI/UX designer with 2+ years of experience establishing successful usability design methods for prominent firms. My goal is to improve communication among end-users, designers, and developers. Capable of handling multiple projects while developing design criteria and improving product experiences for web and mobile- using strong interpersonal, organizational, and administrative skills.

EXPERIENCE

Zaimah Technologies Limited

Associate UI UX Designer | 4 Months

- Enhanced user experience and engagement by creating innovative design concepts, images, and layouts in a fascinating way.
- Steered wireframe design by utilizing Figma for more than 250 wireframe elements and layouts.
- Built digital products with a 10-person development team while adhering to top UI/UX standards, client relationships, and design strategy.

Divine IT Limited

Flutter Developer (Internship) | 6 Months

- Created wireframes, flowcharts, prototypes, and feature matrices solutions for a Food Delivery App with Adobe XD
- Brainstorm product launch ideas and implement web apps using Dart and Rest API and ensure that the UX is intuitive.

PROJECTS

Fitness Mobile App Design (Link)

Design 30+ screen features personalized workout plans, progress and calorie tracking and accessibility for optimal user experience.

Analytic Profile (Link)

Design a website for brand ambassadors to check influencer metrics easily which can enabling them to make informed decisions about hiring them.

Library Dashboard Design (Link)

Design a streamlines resource management for librarians with a user-friendly interface, advanced search, and responsive design.
