EXPERIENCE

Front-End Developer 2022 - 2023

I am a creative frontend developer, interested in creating beautiful web applications. I personally design and develop using HTML, Tailwind CSS and Vue.js to improve user experience.

I use HTML and Tailwind CSS for advanced web styling, providing beautiful and usable styling to applications' interfaces. I build dynamic applications using JavaScript that create interactive experiences with the user.

WordPress 2022 - 2023

I am a creative wordpress designer whose aim is to create beautiful websites by making users' dreams come true. I provide sustainable and professional design using the WordPress platform, which makes the user experience memorable.

I am committed to improving user experience by following new design trends and best practices. I create WordPress websites combining design and development, providing an engaging user-first experience.
