Mohammad Ashik Khan

Full-stack Web Developer

As an adept full-stack developer, I specialize in WordPress development, delivering top-tier web solutions. With expertise in server setup, PHP, JavaScript, jQuery, and responsive web design, I craft custom websites, themes, and plugins. My skills extend to server management, ensuring optimal security and performance. Whether it's e-commerce, blogs, or corporate sites, I bring CMS proficiency to every project. Trust me for website optimization, maintenance, and security. With 8 of experience, I am your go-to professional for all your web and WordPress development needs.

Experience

September, 2020 - August, 2023

Feastify Delivery Inc (Canada)

Software Developer (Remote)

In my role at Feastify, I successfully led comprehensive web development projects, including server setup, maintenance, and specialized WordPress theme and plugin development. My focus on optimizing food delivery websites enhanced user experiences, ensuring smooth online ordering and menu updates. My contributions significantly bolstered the company's digital presence and functionality, driving customer engagement and satisfaction.

July, 2016- May, 2020

Ronbd Inc.

Web Developer

I managed web development projects, creating bespoke websites. I oversaw server setup, hosting management, and VPS configuration, prioritizing performance and security. Moreover, I specialized in WHMCS template design, enhancing billing and automation processes. These efforts collectively ensured a seamless client experience and project success.

January, 2016 - June, 2016

Interactive Data solutions

Training Executive Learning and Earning Development Project (LEDP)

Conducted training for women in Basic Computing, MS Office, and Adobe Photoshop. Empowered participants with essential digital skills to enhance employability. Developed and implemented tailored curricula, resulting in improved digital literacy.
