Frameworks:	Laravel, Codeigniter, Lumin, CakePHP, Node JS, Nest JS, Express, Sequelize, React, Next, Redux, React Query, Chakra UI, Material UI, Tailwind Wordpress, OpenCart, Prestashop, PHP Datagrid, VUE JS, Angular, JQuery
SDLC Models:	WaterFall, Iterative, Spiral, RAD, Prototyping, Agile
Templating:	Blade, Bootstrap, Twig, JSX, Tailwind, Wix
Digital currency:	Cryptocurrency, Blockchain, Ethereum, ERC20 Tokens, ERC225 Tokens, ICO, Exchange Development, Popular Exchanges API
Other:	Chrome Extension, Bot Development, Firefox Extensions, IE Addons, AWS,
Development	Zoho, Odoo, Sage
Tools:	Eclipse IDE, Netbeans IDE, Dreamweaver, Visual Studio, Adobe Photoshop, PHPStorm, Xampp
DevOps:	Git, Git Lab, Bitbucket, Docker, Jenkins, Jira, Slack, AWS

Work Experience

Senior Software Engineer | Elefta Inc; Los Angeles | August 2023 - Current | Senior Software Engineer & Team Lead | Jan's Group (IT Office); Lahore, Pakistan | Jul 2015 – August 2023
Software Engineer | Microtech industries (Pvt) Ltd; Lahore, Pakistan | Jun 2014 – Jul 2015
Web Developer & Designer | SE Software Technology; Multan, Pakistan | Sep 2012 – Jan 2013

- Integrate software product(s) with other systems, test interfaces, and manage version control; assist in analysis & evaluation of new technologies to meet demand for product roadmap and technology platform goals
- Help in evaluation and recommendation of appropriate technologies for product features and platform; advocate and follow best design and development practices adhering to Engineering standards

- Support code development in a very high performance, memory intensive environment; perform system and performance analysis to maximize system throughput
- Collaborate with peers on technical design, work estimation and implementation of new features including interfaces/contracts with storage system, data transformation and handoff to front end technology
- Build test automation suites to ensure the quality of guest impacting products; formulate and define system scope and objectives for assigned projects
- Perform maintenance, installations, upgrades, and other technical duties associated with the support of product applications platforms and/or product systems platforms

PROJECT MANAGEMENT EXPERIENCE

Client: Fiancia.io | Technology: Html, Html5, CSS3, Bootstrap, MySQL, Angular, Node

<https://www.agfolks.com/>

- Developed Ecommerce site with Custom Admin Panel

Client: Elefta Inc | Technology: Html, Html5, Tailwind, React, Next, React Query, Redux, Node, Express, MySQL, Postgress, Heroku

<https://app.elefta.com>

<https://elefta.com>

- The Ultimate Watch Management System

Client: Fiancia.io | Technology: Html, Html5, CSS3, Bootstrap, MySQL, Angular, Node

<https://teachitpro.com/>

- Developed Site for a Institute

Client: Soffos | Technology: Html, Html5, CSS3, WIX, MySQL, Node

<https://www.soffos.ai/>

- Developed Site for a Institute

Client: Fiancia.io | Technology: Html, Html5, CSS3, Bootstrap, Mongo, React, Node, React Native

[https:// lavillahospitality.com/](https://lavillahospitality.com/)

- Developed website For CSS Exam Papers

Client: Fiancia.io | Technology: Html, Html5, CSS3, bootstrap, Php, MySQL, JavaScript, AJAX, JQuery, API, Laravel, Angular4, Database, Blockchain, Cryptocurrency, Ethereum

<https://fiancia.io/cryptotrader/public/login> | <https://www.etoro.com/>

- Held accountable for market, trade, funds, order, and user management, as well as designed backend admin panel, payment gateway, block chain API, token, graphical, and statistical reports.

Client: Turkey Client | Technology: Html, Html5, CSS3, bootstrap, Php, MySQL, JavaScript, AJAX, JQuery, API, Laravel, Angular4, Database, Blockchain, Cryptocurrency, hitbtc API

<https://hitbtc.com/>

- Shoulder the responsibility for bot development for <https://hitbtc.com/> that put automatically order on hitbtc, Live rate from hitbtc, Put order on hitbtc, Cancel orders on hitbtc, and Account detail from hitbtc

Client: Jan's Group | Technology: Php, MySQL, JavaScript, AJAX, JQuery, Codeigniter, Laravel, Lumin, Node.js, Nest JS, React, Next, React Query, Redux, React Native, VUE JS, Database, iauc.co.jp API, Chrome Extension, IE Addons

<https://www.jan-japan.com/> | <http://jijinventorystem.com/> | <http://jantradingco.jp/> | <http://cars4ufzco.com/>

<http://jjpurchase.com/login> | <https://www.imgup.jan-japan.com/jans/> (ADMIN)

<https://www.imgup.jan-japan.com/minisite/> (Car Sold System) | <http://imgup.jan-japan.com/protectedsite/>

<http://imgup.jan-japan.com/tyremini/> | http://imgup.jan-japan.com/jans_invoice/ | http://imgup.jan-japan.com/jans_invoice/

<http://52.30.129.245/uksystem/#/> | <http://jansinterior.com/> | <http://www.janslawfirm.co.uk/> |

<http://onlinelegaladvise.com/> | <http://www.easternlaws.com/>

- Established a system to create sale/ special offers reports, manage live/ Tyres auction, different offices, shipping & invoice, purchase, stock, marketing, and transportation activities.
-

Client: Microtech Industries Pvt Limited | Technology: Html, Html5, CSS3, bootstrap, Php, MySQL, JavaScript, AJAX, Jquery, API, Codeigniter, Laravel, Lumin, Node.js, Angular4, Database, Birt reporting

Project 1: Galaxy-LDIP; Galaxy Load Data Improvement

- Supervised load and losses at grid and feeder level to mitigate instances of unplanned load shedding.
 - Selected MicroTech Industries to implement AMI technology, and awarded by PITC and sponsored by USAID.
-

Project 2: AMR-CIS; versatile user application that provides a web enabled user-friendly interface

- Developed GUI and a user management system with administrative rights, and performed functions, such as remote disconnection/reconnection of meters and billing data export for integration with DISCOs' billing systems.
 - Produced reports to perform data analysis and assess load profiles and other metering data through web device.
 - Accessed application by using authorized user IDs and generate various graphical and tabular reports.
-

Project 3: ADMS; Asset Deployment and Management Suite

- Created a system to provide an overall project rollout performance and generate various reports such as installation progress, team progress, and replaced meter report.
 - Planned, monitored, and managed field network deployments and utilized a GIS based automatic mechanism for progress tracking, dashboard views and progress graphs.
 - Designed and implemented ADMS to assure efficient and streamlined processes, save in time and financial cost, live project updates and automated team management, deployment & verification functions.
-

Client: ANC Company South Africa (ERP System) | Technology: Html, Html5, CSS3, bootstrap, Codeigniter, Php, MySQL, JavaScript, AJAX, JQuery, Angular JS, APi

<http://www.simplo.co.za/admin/>

Client: Amoritali.biz (B2B Platform) | Technology: Html, Html5, CSS3, bootstrap, Laravel, Prestashop, Prestashop Web Services Php, MySQL, JavaScript, AJAX, JQuery, Angular JS, Node.js, APi

<http://www.madeinitaly.amoritalia.biz/>

<http://www.topfashionbrands.amoritalia.biz/>
